PROFILE

- Extensive experience as a freelancer, now seeking to transition into a stable, long-term role within a forward-thinking company where I can grow professionally and contribute to innovative projects.
- Over 10 years of experience in full-cycle web and mobile development using technologies like Laravel, React Native, and Flutter, working effectively both independently and as part of collaborative teams.
- Successfully managed and completed complex projects for clients in Portugal, France, Brazil, and Switzerland, showcasing adaptability and technical expertise.
- Proven ability to successfully lead full-cycle development processes, from planning and architecture to final implementation, ensuring high-quality outcomes tailored to client needs.

PROFESSIONAL EXPERIENCE

Freelancer Full-stack Developer

2013 - Present

Proactive professional with extensive experience in collaborative team environments and a proven track record of overcoming significant challenges since 2013. With expertise in a diverse range of technologies, including Laravel, React.js, Flutter, React Native, and Unreal Engine, among others, I have successfully delivered innovative solutions across various industries. My career highlights include managing and executing complex projects in Portugal, Brazil, France, and Switzerland, consistently exceeding client expectations and demonstrating adaptability in tackling multifaceted challenges.

Versant Web

2024 - Present

At Versant Web, I was responsible for the full development of REST APIs using Laravel and interactive CRM applications in React. My work spanned all stages of the process, from database design to the user interface. Additionally, I ensured the maintenance and continuous optimization of existing projects to meet client requirements effectively.

Start.Physio

2024 - Present

I developed and structured an internal CRM platform tailored to the specific needs of Start.Physio. Using Laravel and React, I managed the entire process, from architectural design to the final delivery of features. This personalized solution significantly improved the company's internal management capabilities.

DManager

2023

I led the development of a CRM application in Flutter designed for managing clients in the hairdressing industry. I took full responsibility for the backend, developed in Laravel, ensuring seamless integration with Flutter and delivering a functional, scalable solution that exceeded client expectations.

IoT - Home Automations

2022 - 2023

I developed intelligent home automation systems for the control and monitoring of domestic devices, tailored to the specific requirements of each client. These custom-built systems enhanced user comfort, energy efficiency, and security by integrating cutting-edge technology and prioritizing user experience.

HTML | CSS | JavaScript | PHP | Laravel | SQL | REST API | React.js | Vue.js | Node.js | ...

Cross-Platform

Flutter | React Native | Electron.js | Ionic

Mobile

Java | Kotlin | Swift

Gaming

Unreal Engine | Unity (C++) | VR

Other Skills

C/C++ | Database Management | IoT | Linux Servers | ...

PROFESSIONAL EXPERIENCE

Co-founder - Health Care Startup

2021 - 2022

As co-founder and Full-Stack Developer, I led the development of a virtual reality game using Unreal Engine 4, designed for rehabilitation clinics. The game was created to support memory disorder treatments through interactive and immersive exercises. I oversaw planning, visual design, and logical implementation, delivering an innovative therapeutic tool.

Webtales

2019

I contributed to the development of the UCPA.com platform, integrating advanced technologies such as VueJS, AMP, NodeJS, and GraphQL. I played a key role in initiating the project by establishing both technical and strategic foundations. Furthermore, I ensured a seamless transition by providing comprehensive guidance to the succeeding team, enabling the continuity and efficiency of the project.

Lusiaves

2019

As a team leader at Lusiaves, I contributed to the development of a React Native mobile application integrated into the company's core production line. I collaborated closely with the team to ensure code quality and alignment with production requirements, optimizing the efficiency of critical processes.

AvilConnect

2018 - 2019

I managed and developed a business application in Java with RestAPI, alongside a website using Laravel and React.js. Overseeing all stages of the project, I ensured seamless integration between the Java application, web technologies, delivering an efficient solution that enhanced the client's operations and management processes.

The SilverFactory

2015

As a Full-Stack Developer at The SilverFactory, I designed and developed dynamic, intuitive websites using technologies such as HTML, CSS, JavaScript, and Laravel. I focused on combining aesthetics and functionality, optimizing performance, and ensuring compatibility across browsers and devices, delivering solutions that fully met client expectations.
